Nina Wilson, Ph.D.

Director of Smart Cities Initiatives

Nina Wilson brings 12 years of applied sciences and building industry experience to her role in developing and deploying Smart Cities initiatives with MuniSkies. She has brought the perspective of her background in architecture, building technologies innovation, and urban development to a unique problem-solving approach in generating new research and tools for collaboration in academic and industrial settings. She holds a doctorate from Rensselaer Polytechnic Institute, where she specialized in adapting interdisciplinary engineering strategies to the development of new technology-based approaches to improving urban environmental issues, energy economics, and human health outcomes in cities. Her research has been funded by New York State agencies and the federal government, as well as private foundations. Prior to her career in research and development, she practiced architecture internationally and worked to integrate building energy technologies into municipal, residential, and commercial projects.
